

PRODUCT CATALOGUE 2026-2027

Human Molecular Diagnostics

GENETICS • ONCOLOGY • INFECTIOUS DISEASES
AUTOMATION AND EXTRACTION

Scientific expertise in molecular diagnostics.
Solutions designed to meet laboratory needs.

Contents

Part 1	Genetics	7
	Thrombophilia	8
	Hereditary hemochromatosis	8
	APOE	8
	Male infertility	9
	Recurrent miscarriage	9
	Chromosomal aneuploidies and UPD 15	9
	Ankylosing spondylitis	9
	Pharmacogenetics	10
	Celiac disease	10
	Lactose intolerance	10
	Bitter taste	10
	Age-related macular degeneration	11
	Gilbert syndrome	11
	Fragile X-related disorders	11
	Spinocerebellar ataxia types 1, 2, 3, 6 and 7	11
	Huntington's disease	12
	Myotonic dystrophy	12
Part 2	Oncology	13
	Microsatellite instability	14
	Clonality and lymphomas	14
	Oncohaematology	14
	Calreticulin	14
Part 3	Infectious diseases	15
	Emerging and tropical infections	16
	Viral monitoring	16
	Hepatitis	17
	Respiratory infections	17
	SARS-CoV-2	17
	Sexually transmitted infections	18
	Pregnancy and congenital infection monitoring	18
	Healthcare-associated infections	18
	Environmental water testing	18
Part 4	Automation and nucleic acid extraction	19
	Clonit Kits for automated workflows on QIAasymphony SP/AS	20
	Automated Nucleic Acid Extraction – CloNext System	21
	Manual Extraction	22

Introduction

Technical and regulatory information

REGULATORY STATUS

IVDR

In vitro diagnostic medical device compliant with Regulation (EU) 2017/746.

CE-IVD – Legacy device

CE-marked *in vitro* diagnostic medical device under Directive 98/79/EC and placed on the market in accordance with the applicable transitional provisions of Regulation (EU) 2017/746.

RUO – Research Use Only

Product intended for research use only and not for use in diagnostic procedures.

TECHNOLOGIES AND ANALYSIS METHODS

Real-Time PCR

Nucleic acid amplification and fluorescence-based detection, with target quantification in selected kits.

PCR and post-amplification analysis

Products requiring fragment analysis are identified in the catalogue by the following superscripts:

¹ Fragment analysis by capillary electrophoresis using a genetic analyser.

² Fragment analysis by agarose gel electrophoresis.

The regulatory status shown refers to the product version available at the date of publication of this catalogue. For up-to-date information, please refer to the relevant Instructions for Use and Declarations of Conformity, or contact Clonit at customer care@clonit.it.

Clonit

Scientific expertise applied to the design and manufacture of molecular diagnostic solutions.

Clonit develops and manufactures *in vitro* diagnostic solutions designed to meet the needs of molecular diagnostic laboratories.

Our scientific and application expertise enables us to offer solutions for genetics, molecular oncology, infectious diseases and laboratory automation, supporting professionals throughout the different stages of the diagnostic workflow.

Quality, reliability and technical support guide the development of our product portfolio and our relationships with laboratories, healthcare institutions and commercial partners.

History, expertise and growth

Founded in 1987

Clonit has built extensive expertise in the design and manufacture of reagents for molecular diagnostics, initially focusing particularly on infectious diseases.

Expanding expertise

The acquisitions of Euroclone Diagnostici in 2020, Experteam in 2022 and Dia.Pro Diagnostic Bioprobes in 2025 have progressively expanded the Group's portfolio and expertise in genetics, molecular oncology and *in vitro* diagnostics more broadly.

Scientific and regulatory development

Over the years, Clonit has participated in applied biomedical research projects and developed molecular assays to address emerging diagnostic needs. This journey has strengthened its scientific, manufacturing and regulatory expertise, supporting the company's evolution and progressive compliance with European regulatory requirements.

Scientific partnerships and quality

The company's growth is supported by collaborations with academic institutions and hospitals. Development and manufacturing activities are conducted within a certified Quality Management System, ensuring process control and compliance with applicable requirements.

Genetics

Molecular solutions for genetic variant analysis in inherited disorders, pharmacogenetics and personalised medicine.

Technologies

Real-Time PCR and
PCR with fragment analysis

Personalised medicine

Genetic information to support risk stratification
and treatment selection

Applications

Testing for inherited disorders, genetic predisposition
and drug response

Specialist support

Dedicated technical and scientific support
for laboratories

Thrombophilia

Genotyping of variants associated with thrombotic risk and inherited thrombophilia.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
EER037032	Duplica RealTime Mix & Match Factor II G20210A Kit	FII G20210A	32 tests	CE-IVD

EER043032	Duplica RealTime Mix & Match MTR A2756G Kit	MTR A2756G	32 tests	CE-IVD
EER053032	Duplica RealTime Mix & Match PAI Genotyping Kit	PAI-1 4G/5G	32 tests	CE-IVD
EER048050	Duplica RealTime HPA 1 a/b Genotyping Kit	ITGB3 (HPA-1 a/b)	50 tests	CE-IVD
EER049050	Duplica RealTime Beta-Fibrinogen 455G>A Genotyping Kit	FGB -455 G>A	50 tests	CE-IVD

† Version for the Rotor-Gene® Q thermal cycler (QIAGEN).

‡ Version for the CFX96™ and CFX96™ Dx thermal cyclers (Bio-Rad) and the Applied Biosystems™ 7500 Real-Time PCR System (Thermo Fisher Scientific).

Hereditary hemochromatosis

Molecular detection of the main HFE gene variants associated with hereditary haemochromatosis.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
EER044032	Duplica RealTime Mix & Match HFE C282Y Kit	HFE C282Y	32 tests	CE-IVD
EER045032	Duplica RealTime Mix & Match HFE H63D Kit	HFE H63D	32 tests	CE-IVD
EER046032	Duplica RealTime Mix & Match HFE S65C Kit	HFE S65C	32 tests	CE-IVD
HE.01RQ	Hemochromatosis mutations kit-RQ	C282Y / H63D / S65C	40 tests	CE-IVD

APOE

APOE allele genotyping for the assessment of risk associated with neurodegenerative and cardiovascular diseases.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
EER018032	Duplica RealTime Apo E Genotyping Kit	APOE ε2 / ε3 / ε4	32 tests	CE-IVD

Male infertility

Analysis of Y-chromosome microdeletions in the AZF region associated with male infertility.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
AZ.022 FLv2	AZF deletion Kit v2-FL ¹	AZFa, AZFb and AZFc regions (extension)	25 tests	IVDR (CE 0123) soon
AZ.024	Multiplex OligoAzoosp.gr/gr Kit 3 ²	AZFa, AZFb and AZFc regions	50 tests	CE-IVD
AZ.024FL	Multiplex OligoAzoosp.gr/gr Kit 3-FL ¹	AZFa, AZFb and AZFc regions	50 tests	CE-IVD

Recurrent miscarriage

Genotyping of *HLA-G* gene polymorphisms associated with recurrent miscarriage and repeated *in vitro* fertilisation failure.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
HG.02RQ	HLA-G Kit 2-RQ	14 bp ins/del, -725C>G/T	40 tests	CE-IVD
HG.01FL	HLA-G 14 bp Indel Kit 1 – FL ¹	14 bp ins/del	40 tests	CE-IVD

Chromosomal aneuploidies and UPD 15

Solutions for the analysis of selected chromosomal aneuploidies in miscarriage cases and for the investigation of chromosome 15 uniparental disomy (UPD 15).

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
AN.06FL	Miscarriages Aneuploidies QF-PCR Kit ¹	chromosomes 15, 16, 22	50 tests	CE-IVD
UD.01FL	UPD 15 Kit 1-FL ¹	chromosome 15	25 tests	CE-IVD

Ankylosing spondylitis

HLA-B*27 typing to support the diagnosis of seronegative spondyloarthritis.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
RT-53	HLA-B*27	HLA-B*27	48 tests	CE-IVD (0318)

¹ Fragment analysis by capillary electrophoresis on a genetic analyser.

² Fragment analysis by agarose gel electrophoresis.

Pharmacogenetics

Genotyping solutions for clinically relevant variants affecting drug metabolism and response, supporting more informed and personalised treatment decisions.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
RT-104	DPYD (5 gene mutations)	c.1905+1G>A, c.1129-5923C>G, c.2846A>T, c.1679T>G, c.2194G>A	24 tests	IVDR(CE0123)
EER052032	Duplica RealTime HLA-B*5701EZ Type Kit	HLA-B*5701	32 tests	CE-IVD (0318)
EER055050	Duplica RealTime CYP2C9*2 Genotyping Kit	CYP2C9*2	50 tests	CE-IVD
EER056050	Duplica RealTime CYP2C9*3 Genotyping Kit	CYP2C9*3	50 tests	CE-IVD
EER054050	Duplica RealTime VKORC1 1639G>A Genotyping Kit	VKORC1-1639 G>A	50 tests	CE-IVD

Celiac disease

HLA-DQ2 and HLA-DQ8 typing by Real-Time PCR to assess genetic predisposition to coeliac disease and support patient risk stratification.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
RT-59v4	Celiac Disease - Gluten DQuick DResolution v4	DQ2.5, DQ2.2, DQ8, DQ7.5, DQ2.3	48 tests	IVDR(CE0123)
RT-59v4_96	Celiac Disease - Gluten DQuick DResolution v4	DQ2.5, DQ2.2, DQ8, DQ7.5, DQ2.3	96 tests	IVDR(CE0123)
PL-01	Plug-in Analyze software		1 licence	n.a.

Lactose intolerance

Detection of key *LCT* gene variants associated with adult-type hypolactasia, supporting the genetic assessment of lactose intolerance.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
RT-11	Lactose Intolerance LCT C13910T	LCT C13910T	48 tests	CE-IVD
RT-37	Lactose Intolerance LCT	LCT C13910T; G22018A	48 tests	CE-IVD

Bitter taste

Genotyping of *TAS2R38* allelic variants associated with individual differences in bitter taste perception.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
BT.01RQ	Bitter Taste Detection Kit - RQ	rs713598	40 tests	RUO

Age-related macular degeneration

Real-Time PCR analysis of single nucleotide polymorphisms associated with susceptibility to age-related macular degeneration (AMD), enabling individual genetic risk stratification as low, intermediate or high.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
RT-105	Maculopathy Kit	rs10490924, rs800292, rs1061170, rs12144939	24 tests	RUO

Gilbert syndrome

Analysis of *UGT1A1* gene variants associated with Gilbert syndrome and altered bilirubin metabolism.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
EER025032	Duplica RealTime Gilbert's Syndrome Genotyping Kit	UGT1A1*1, *28	32 tests	CE-IVD
GS.01FL	Gilbert Syndrome Kit-FL ¹	UGT1A1*1, *28, *36, *37	40 tests	CE-IVD

Fragile X-related disorders

Detection of premutation-range repeat expansions in the *FMR1* and *FMR2* genes, supporting the investigation of Fragile X-related conditions, including FXPOI and FXTAS.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
FR.01FL	FraxA 1 Kit – FL ¹	<i>FMR1</i> gene premutation	40 tests	CE-IVD
FR.02FL	FraxE 1 Kit – FL ¹	<i>FMR2</i> gene premutation	40 tests	RUO

Spinocerebellar ataxia types 1, 2, 3, 6 and 7

Detection of CAG repeat expansions associated with the most common autosomal dominant spinocerebellar ataxias: SCA1, SCA2, SCA3, SCA6 and SCA7.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
SC.01FL	SCAs Kit-FL ¹	CAG repeat expansions in <i>ATXN1</i> , <i>ATXN2</i> , <i>ATXN3</i> , <i>CACNA1A</i> and <i>ATXN7</i> genes	25 tests	CE-IVD

¹ Fragment analysis by capillary electrophoresis using a genetic analyser.

Huntington's disease

Detection of CAG repeat expansions in the *HTT* gene to support the molecular diagnosis of Huntington's disease.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
HD.01FL	Huntington disease Kit 1-FL ¹	CAG repeat expansion in the <i>HTT</i> gene	40 tests	CE-IVD

Myotonic dystrophy

Molecular assays for detecting repeat expansions associated with myotonic dystrophy types 1 and 2.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
DM.02FL	Myotonic Dystrophy type 1 SB Kit – FL ¹	CTG repeat expansion in the <i>DMPK</i> gene	40 tests	RUO
DM.04FL	Myotonic Dystrophy type 1 GC Kit – FL ¹	CTG repeat expansion in the <i>DMPK</i> gene	40 tests	CE-IVD
DM.03FL	Myotonic Dystrophy type 2 SB Kit – FL ¹	CCTG repeat expansion in the <i>CNBP</i> gene	40 tests	RUO

¹ Fragment analysis by capillary electrophoresis using a genetic analyser.

Oncology

Molecular solutions for the diagnosis, characterisation and monitoring of haematological malignancies and solid tumours.

Molecular profiling

Analysis of mutations, gene rearrangements and microsatellite instability

Oncohaematology

Identification and quantification of key fusion transcripts

Disease monitoring

Solutions for measurable residual disease (MRD) assessment

Lymphoid clonality

Analysis of Ig and TCR gene rearrangements

Microsatellite instability (MSI)

Analysis of microsatellite instability in sporadic gastric and colorectal cancers and in tumours associated with Lynch syndrome, also known as hereditary non-polyposis colorectal cancer (HNPCC).

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
MS.01FL	HNPCC Kit 1 – FL ¹	BAT-25, BAT-26, NR-21, NR-22, NR-24, D13S317 and D16S539 markers	40 tests	CE-IVD

Clonality and lymphomas

Molecular assays for assessing B- and T-cell clonality through the analysis of immunoglobulin heavy chain (IgH) and T-cell receptor gamma (TCR γ) gene rearrangements.

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
BL.01FL	B cell lymphoma Kit-FL ¹	IgH locus rearrangements	40 tests	CE-IVD
TL.01FL	T cell lymphoma Kit-FL ¹	TCR γ locus rearrangements	40 tests	CE-IVD

Oncohaematology

Molecular kits based on one-step Real-Time RT-PCR for the identification and quantification of the main fusion transcripts associated with acute myeloid leukaemias (AML), also usable in measurable residual disease (MRD) monitoring.

Catalogue No.	Product Name	Pack Size	Regulatory Status
RT-100	PML-RARA t(15;17)(q22;q21)	24 tests	CE-IVD
RT-101	AML1-ETO t(8;21)(q22;q22)	24 tests	CE-IVD
RT-102	INV(16)(p13q22) - CBFB-MYH11	24 tests	CE-IVD

Calreticulin

Molecular assay for detecting the most common *CALR* gene mutations, including Type 1 and Type 2, associated with Philadelphia chromosome-negative myeloproliferative neoplasms (Ph-negative MPNs).

Catalogue No.	Product Name	Detection Target	Pack Size	Regulatory Status
MP.01FL	MPNs Kit 1 – FL ¹	Exon 9 of the <i>CALR</i> gene	40 tests	CE-IVD

¹ Fragment analysis by capillary electrophoresis using a genetic analyser.

Infectious diseases

Molecular solutions for the detection, identification and quantification of pathogens of clinical and public health relevance.

Broad range of applications

Emerging, respiratory, sexually transmitted and healthcare-associated infections

Identification and quantification

Qualitative and quantitative assays designed to address different diagnostic needs

Operational flexibility

Solutions and formats adaptable to different laboratory workflows

Emerging and tropical infections

Real-Time PCR assays for the detection, typing and/or quantification of emerging and tropical pathogens subject to public health surveillance.

Catalogue No.	Product Name	Pack Size	Regulatory Status

Hepatitis

Molecular assays for the detection and quantification of hepatitis viruses.

Catalogue No.	Product Name	Pack Size	Regulatory Status
RT-49v2	quanti HDV	48 tests	RUO
RT-02	quanti HAV	48 tests	CE-IVD
RT-41	quanti HEV	24 tests	CE-IVD

Respiratory infections

Molecular diagnostic solutions for bacterial respiratory pathogens and mycobacteria.

Catalogue No.	Product Name	Pack Size	Regulatory Status
EBR019032	Duplica RealTime M. tuberculosis Complex kit	32 tests	CE-IVD
EBR010032	Duplica RealTime Mycobacterium avium complex Detection kit	32 tests	CE-IVD
EBR012032	Duplica RealTime Mycoplasma pneumoniae Detection kit	32 tests	CE-IVD
EBR011032	Duplica RealTime Legionella spp. Detection kit	32 tests	CE-IVD
EBR007032	Duplica RealTime Legionella pneumophila Detection kit	32 tests	CE-IVD

SARS-CoV-2

Real-Time PCR solutions for the detection of SARS-CoV-2 and respiratory co-infections.

Catalogue No.	Product Name	Pack Size	Regulatory Status
RT-25HT	Covid 19 HT Screen (N1, N2)	96 tests	CE-IVD
RT-25HT501	Covid 19 HT Screen 501 (N1, N2, S gene)	96 tests	CE-IVD
RT-26	Flu A/Flu B/SARS-CoV-2	96 tests	CE-IVD

Sexually transmitted infections

Molecular diagnostic solutions for the detection of major sexually transmitted infections.

Catalogue No.	Product Name	Pack Size	Regulatory Status
EBR038032	Duplica RealTime Trichomonas vaginalis kit	32 tests	CE-IVD
EBR015032	Duplica RealTime Mycoplasma hominis kit	32 tests	CE-IVD
EBR016032	Duplica RealTime Ureaplasma urealyticum kit	32 tests	CE-IVD

RT-22	Chlamydia trachomatis	48 tests	CE-IVD (0318)
EBR018032	Duplica RealTime Neisseria gonorrhoeae 2nd Generation Detection kit	32 tests	CE-IVD

Pregnancy and congenital infection monitoring

Molecular assays for the detection and monitoring of infections relevant to pregnancy and congenital disease.

Catalogue No.	Product Name	Pack Size	Regulatory Status
RT-94	quanti TOXO	48 tests	CE-IVD (0318)
RT-06	quanti Measles	48 tests	CE-IVD
RT-39	quanti Rubella	48 tests	RUO
RT-21	quanti Measles/Rubella	48 tests	RUO

Healthcare-associated infections

Detection of pathogens and antimicrobial resistance markers associated with healthcare-associated infections.

Catalogue No.	Product Name	Pack Size	Regulatory Status
EBR026032	Duplica RealTime Advanced C. difficile A/B kit	32 tests	CE-IVD
EBR040032	Duplica RealTime MDR A. baumannii OXA Genotyping kit	32 tests	CE-IVD

Environmental water testing

Molecular assays for the microbiological monitoring of environmental water.

Catalogue No.	Product Name	Pack Size	Regulatory Status
SS.01RQ	Salm Shig detection Kit - RQ	50 tests	RUO
VB.01RQ	Vibrio all species Kit - RQ	150 tests	RUO

Automation and nucleic acid extraction

Systems and reagents for nucleic acid extraction and pre-analytical workflow automation, from sample preparation to PCR reaction setup.

Pre-Analytical Automation

Nucleic acid purification and automated PCR plate setup

Complete Solutions

Automated workflows and kits for manual nucleic acid extraction

Flexibility

Systems and protocols designed for different biological sample types

Standardisation

Fewer manual steps and improved process traceability

Clonit Kits for Automated Workflows on QIA Symphony SP/AS

Clonit diagnostic kits configured for pre-analytical workflow automation on QIA Symphony SP/AS platforms (QIAGEN). The system integrates automated nucleic acid purification with subsequent PCR reaction plate setup, reducing hands-on steps while improving process standardisation and traceability.

OP02008-48	CloNext TB DNA Extraction Kit	48 tests	IVDR
OP02009-48	CloNext FFPE DNA Extraction Kit	48 tests	IVDR
OP02010-48	CloNext Forensic DNA Extraction Kit	48 tests	IVDR
OP02011-48	CloNext Viral/Pathogen Nucleic Acid Ex Kit A	48 tests	IVDR
OP02012-48	CloNext Viral/Pathogen Nucleic Acid Ex Kit B	48 tests	IVDR
OP02013-48	CloNext Viral RNA Extraction Kit	48 tests	IVDR
OP02014-48	CloNext Plant DNA Extraction Kit	48 tests	IVDR
OP02015-48	CloNext Total RNA Extraction Kit	48 tests	IVDR
OP02016-48	CloNext Viral Nucleic Acid Extraction Kit LV	48 tests	IVDR
OP02017-48	CloNext CFC DNA Extraction Kit	48 tests	IVDR
OP02032-48	CloNext Urine cfDNA Extraction Kit	48 tests	RUO
OP02033-48	CloNext Plasma cfDNA Extraction Kit	48 tests	RUO

Manual Extraction

Kits for manual nucleic acid extraction and preparation from different biological sample types.

Catalogue No.	Product Name	Pack Size	Regulatory Status
EDR004050	BACT Extra Pure Kit	50 tests	IVDR
EMR061050	Spin DNA Purification Kit	50 tests	IVDR
EMR057050	Fasst DNA Releaser Kit	50 tests	IVDR
EDI004200	Duplica NA Body Fluid Kit	180 tests	IVDR
